PRODUCT AREA 1 – CLOSURE SYSTEMS

STEEL DRUM

PLASTIC DRUM

OPEN TOP & CLOSED TOP

>2.500 Different types of clamping rings

FIBER DRUM

PAIL

FACTORY NEW & RECONDITIONED

Lids and gaskets

RINGMETALL GROUP – BUSINESS UNIT CLOSURE SYSTEMS

PRODUCT AREA 1 – CLOSURE SYSTEMS

BU Closure Systems is well positioned in a market with high barriers to entry.

Factory Equipment

With high barriers to market entry in terms of safety testing and documentation

Logistics Costs

Stacking rings is highly inefficient, resulting in high logistics costs and thus the need for a global presence.

Time-critical product

Lead times are usually only 5-7 working days, which makes intercontinental procurement impossible and requires a global presence.

Cost vs. Risk

The low average price of a clamping ring stands in stark contrast to its importance for safety, resulting in extremely high customer loyalty.

Efficiency

> 2,500 different ring types, highly efficient machinery, and consistent quality worldwide make production outsourcing attractive for barrel manufacturers.

Regulations

Industrial drums for hazardous goods are strictly regulated by the United Nations; replacing individual components would require immediate recertification of the drum unit.

RINGMETALL GROUP – BUSINESS UNIT LINER

PRODUCT AREA 2 – LINER

DRUM
LINER

1,000L LINERS

BOXLI

BAG IN BOX
SYSTEMS

TANK BEER SYSTEMS
BEER LINERS

HUGE VARIETY
OF LINERS

> 4,000 Different styles for a wide range of appliances for different industries, such as Pharma, Chemical, Food & Beverage, Automotive and Electronics
